

Security/Data Product Showcase

NAS Invites you to a showcase of the latest CCTV, Intrusion and Enterprise Wi-Fi products

food and drinks provided

Overview

Please join us at our Mayfield Showroom on Tuesday the 12th of September for a showcase of the latest CCTV, Intrusion and Enterprise Wi-Fi products from WAMA, Risco and Ubiquiti.

Aaron Obrist from RISCO Group will conduct the Risco session, Product Director David Dargie will conduct the WAMA session and NAS Australia IT Manager Mark Roermann will conduct the Ubiquiti session.

The three sessions will focus on product basics, use case scenarios and the points of difference that separate these industry leaders from other similarly priced alternatives. The sessions are introductory by nature and will not be overly technical. Hands on practical demonstrations will reinforce what you have learned in each session.

Please note that spaces are limited so reserve your seat as soon as possible.

Who should attend? Consulting engineers, specifiers, systems integrators and installers.

Where

NAS Newcastle Branch
235 - 237 Maitland Road, Mayfield, NSW, 2304

When

Tuesday 12th September 7:30am ~ 1:00pm

7.30 - 8.00am:	BBQ Breakfast Served
8.00 - 9.20am:	Introduction to Risco (Intrusion)
9.30 - 10.50am:	Introduction to WAMA (CCTV)
11.00 - 12.20pm:	Introduction to Ubiquiti (Wi-Fi)
12.30 - 1.00pm:	Lunch served

Mark, David and Aaron will be on hand after lunch for one-on-one questions or product demos should you like to delve into the products in more depth.

RSVP

newcastle@nasaaustralia.com.au by Tuesday the 5th September 2017 or through your NAS Australia Sales Rep.

About WAMA:

WAMA is a CCTV technology company incorporated in Hong Kong and offering a range of video surveillance solutions catering to the needs of the mass market. The WAMA management team has over 20 years of experience in the industry and a strong R&D focus. WAMA is a fast-growing brand and its global distribution network is expanding rapidly across Asia, Australia, Europe, Middle East, North America and South Africa.

About Risco Group:

Risco produces security products for every type of security installation. From intrusion alarm systems for residential and commercial installations -- including a full range of accessories -- to large scale access control and integrated security and building management platforms.

About Ubiquiti Networks:

Ubiquiti Networks offers a portfolio of networking products and solutions. AirMAX and EdgeMAX product platforms provide carrier-class network infrastructure for fixed wireless broadband, wireless backhaul systems and routing. The Unifi platform provides wireless local area network (WLAN) infrastructure, video surveillance products, switching and routing solutions.

Security/Data Product Showcase

David Dargie
Product Director

As the son of the original proprietors of NAS Australia (formerly Nationwide Antenna Systems), David has been involved with antennas, cabling and RF electronics for much of his life and is committed to the task of growing the family business as his parents did, to the provision of excellent products at competitive prices for our customers, and also to the free exchange of knowledge and best practices to those who work daily in the field.

Commercial and domestic cabling systems have come a long way over the past few decades in TV, AV, control systems, IT and security, some of them combined, some shared and some gone wireless. As the Product Director at NAS, David has needed to stay current with the many different cabling and wireless technologies and provide our customers with cutting edge products that enable diversification opportunities.

Aaron Obrist
Technical Sales Engineer

Aaron Obrist has 14 years of experience in the security industry in various technical roles. Starting with Risco in 2013 as Technical support manager for the NSW, QLD & WA regions Aaron has progressed into a technical sales role.

Based in NSW, he supports the entire range of Risco's cloud based intrusion, image verification and application technologies.

Mark has been with NAS Australia full-time for 12 years, looking after in-house IT and Desktop Publishing. As a generalist Mark has experience with Network Administration, System Administration, Linux/UNIX, WiFi & RF Analysis, Virtualisation and SAAS/IAAS cloud systems.

The dramatic increase in products that require IP expertise has meant Mark has emerged from behind the scenes to become more customer facing. Today, he supports the sales team with product development assistance, technical sales and technical support of the diversification range including fixed and enterprise wireless, networking products, IP CCTV & Access Control while still juggling the internal IT systems across all our branch offices.

Mark Roemermann
IT Manager
