

Kingray LTE Filter

FILLPJTE25

The Kingray LTE Television Interference Filter pass up to Ch 51 (channel blocks A to E or 694MHz) whilst rolling off everything above Ch 51 by up to 25dB @ 750MHz.

With high attenuation at the right frequency, LTE filters solve LTE interference problems and have already been proven to eliminate television interference from sources including GSM/4G networks.

Features

- Metal Housing
- Compact design
- F type Connectors
- Can be installed inside a MHB001 masthead case for external use

Specifications

Pass Band	5-694 MHz
Insertion loss	< 2dB
Stop band attenuation	>25dB @ 750MHz
