

Simple Wall Mounts Product Release

The team at NAS Australia is excited to announce that we have been selected as the Exclusive Australian Distributor for the Simple Wall Mount Co. To commence with will be ranging the iPad Mini wall mount for 1st, 2nd and 3rd generation iPad Mini's and the iPod 5th generation wall mount.

About Simple Wall Mount Co

Here at Simple Wall Mount Co. we have made it our mission to provide a high quality product at an affordable price to you. Our moulds are designed with extreme precision using the finest material available. This creates a finished product with the greatest consistency and quality in the industry.

We are proud to say that our products are made in America. We take it one step further making every effort to acquire all of our material locally. The process not only gives us more control during manufacturing, it also helps our local economy.

Simple Wall Mount is not only our name it is our motto! It is a simple idea to offer a quality product at an affordable price with an easy installation. Our aim is to provide you with exactly that, a simple experience!

About the product

All of our flush mount enclosures for your Apple products have been designed with style and simplicity in mind. They work in a fashion similar to your average light switch cover. This allows all of our mounts to compliment the style of the rest of your home or office fixtures.

The back plate of the mount has been designed to sit in your drywall. It fastens to the backside of the plaster wall by simply turning a few screws. The back plate of the wall mount provides access for the power cord and audio cable to plug directly into your device keeping all cords hidden. The faceplate is about 6.35mm thick and sits against the front of the plaster wall. Each wall mount contains two faceplates. One faceplate allows access to the home button, for various applications. The other faceplate covers the home button, ideal for limiting the device to one application.

iPad Mini Wall Mount Product Release SWMMINI060

This wall mount is designed for use with the iPad Mini 1st, 2nd, and 3rd Generations. All Simple Wall Mount Co. products have been designed with style and simplicity in mind. They work in a fashion similar to your average light switch cover. This allows all of our mounts to blend with the style of the rest of your home fixtures. The back plate of the mounts has been created to sit in your plaster wall. It fastens to the backside of the plaster wall by simply turning a few screws. The faceplate is about 6.35mm thick and sits against the front of your plaster wall. It fastens to the back plate by way of magnets. This design provides a sleek and stylish look for all of your home automation, home audio, or other needs. It also allows you to remove the iPad Mini with ease.

Each wall mount contains two gloss white faceplates, which can be painted. One faceplate allows access to the home button, giving you the ability to use your iPod for various applications. The other faceplate covers the home button. This makes the mount ideal for a one application use system, such as home automation.

The back plate of the wall mount has an opening for the power cord to plug directly into the iPad Mini behind the plaster wall. This keeps your cords out of view and gives you the option to have your iPad Mini charging at all times (power supply not included) The mount can be installed for both a portrait or landscape orientation.

iPod 5th generation Wall Mount Product Release

SWMPOD5TH

This wall mount is designed for use with the iPod Touch 5th Generation. All Simple Wall Mount Co. products have been designed with style and simplicity in mind. They work in a fashion similar to your average light switch cover. This allows all of our mounts to blend with the style of the rest of your home fixtures. The back plate of the mount has been created to sit in your plaster wall. It fastens to the backside of the plaster wall by simply turning a few screws. The faceplate is about 6.35mm thick and sits against the front of your plaster. It fastens to the back plate by way of magnets. This design provides a sleek and stylish look for all of your home automation, home audio, home theatre, or other needs. It also allows you to remove the iPod with ease.

Each wall mount contains two gloss white faceplates, which can be painted. One faceplate allows access to the home button, giving you the ability to use your iPod for various applications. The other faceplate covers the home button. This makes the mount ideal for a one application use system, such as home automation.

The back plate of the wall mount has an opening for the power cord to plug directly into the iPod behind the drywall. This keeps your cords out of view and gives you the option to have your iPod charging at all times (power supply not included).
