

Often,
Simple
is best.

SignalMAX has always stood for optimal performance. But it's also been about no nonsense. Cat6A shielded ethernet cables are the new standard for 10Gbit performance, featuring full shield and foil wrapped pairs (S/FTP). With convenient lengths, interchangeable colour markers and snagless clips, make every patch panel look and perform at its best. Simple.

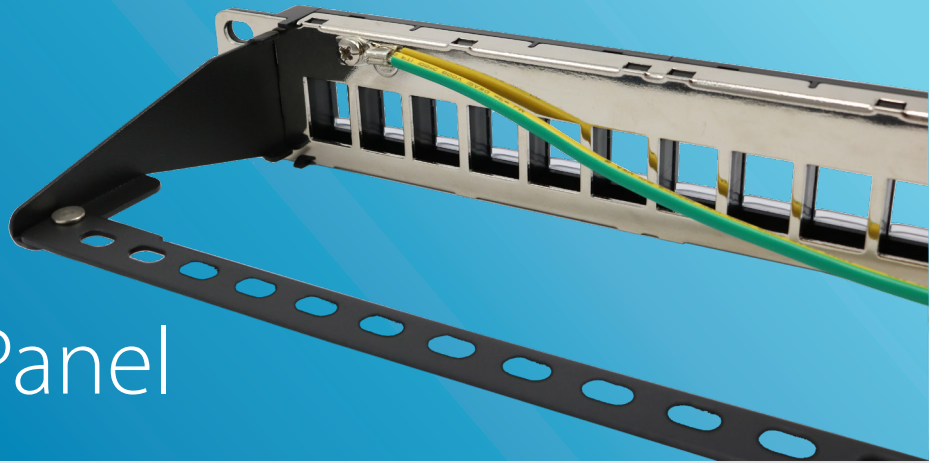

Replacement Colour Clips

No longer carry multiple bags of coloured cables. Just replace the clips as required.

Product Code	Grade	Cable	Length	Conductor Size	Braid Shield	Foil Pairs

Customisable CAT6/A Patch Panel

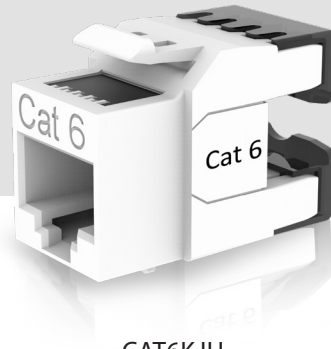

Keystone Jacks

CAT6AKJS

Fully shielded Cat6A 180° keystone jack, tool-free type, dust shutter. Easy snap in/out of patch panel. Cat6A & PoE+ verified.

CAT6KJU

Cat6 180° keystone jack 110/Krone punch down type, white. TIA568A/B markings

Keep it simple with the go-to 24-port patch panel. Featuring support bar and grounding cable, SignalMAX makes it easy to terminate cables to get it right every time. Terminate keystones at a comfortable height and then snap into place and fix to the support bar with a cable tie. Cat6A shielded keystones allow for proper grounding when running PoE applications. Replaceable card for port marking. Durable enough for hundreds of termination and mating cycles, SignalMAX helps you get it right the first time.
